

About

When shipping or accepting live animals for air transport, it's crucial to adhere to the IATA Live Animals Regulations (LAR). This course provides essential knowledge of the global standards set by LAR for the safe and humane transport of live animals. Designed for shippers, freight forwarders, and cargo acceptance representatives, the course covers container requirements, documentation, and animal health awareness. Gain a thorough understanding of how to comply with airline regulations and international welfare standards to ensure the well-being of transported animals.

Objective

Upon completing this course, you will have the skills to:

- Protect the safety and welfare of animals on the ground and in the air.
- Understand the principles of container design for live animals.
- Identify the appropriate container requirements for different types of animals.
- Describe carrier requirements and relevant government regulations.
- Identify relevant documentation.

Prerequisite

- Proficient in both spoken and written English; knowledge of other languages is a plus.

Exam & Certification

- Exam Method: Online exam with remote supervision by IATA
- Passing Grade: 60% correct answers

Participants who successfully pass the final exam will be awarded:

- An IATA and KHDA Certificates are awarded to participants successfully passing the final exam.

Content

The key topics covered during this course include:

- Proper use of IATA's Live Animals Regulations (LAR) manual
- Responsibilities of shippers and carriers
- Government and airline regulations
- Documentation, marking, and labeling requirements for live animal shipments
- Classification of live animals and selection of the correct container requirements
